

510

Continuous Blowdown Ball Valve 510 PN 16 DN 15

Purpose and Application

Ball valve with electric actuator for discharging boiler blowdown from steam boilers. The continuous blowdown ball valve 510 is designed for use with the boiler blowdown controller LRR 1-50, LRR 1-52 or the conductivity switch LRS 1-50 and the conductivity electrodes LRG 16-9 or LRG 16-4. The equipment combination is designed for use in automatically operated installations, e. g. in compliance with the directives for operation without constant supervision to TRD 604 EN 12952 and EN 12953.

Design

The continuous blowdown ball valve 510 consists of a maintenance-free three-piece stainless steel ball valve with an integrated electric actuator.

Design

Continuous blowdown ball valve 510 with screwed sockets BSPT 1/2".

Function

The TDS (= total dissolved solids) content of the boiler water is monitored by the conductivity controller by means of a conductivity electrode. When the set point adjusted on the conductivity controller is exceeded in the boiler water (e. g. due to increased steam outlet), the conductivity controller switches the relay for the valve position to "OPEN". The degree of opening and consequently the flowrate of the ball valve in "OPEN" position can be adjusted with a control cam on the servomotor.

Technical Data

Service pressure
10 barg at 185°C

Kvs value
10.2 m³/h

Nominal size
BSPT 1/2", DN 15

End connection
Screwed sockets

Material
1.4401

Actuator
EF 0.7

Mains voltage
230V, 50/60 Hz

Power consumption
4 VA

Actuator speed
60 sec. for 90°

Torque
15 Nm

Ambient temperature
Max. 60°C

Protection
IP 65

Actuator case material
Housing: Die-cast aluminium
Cover: Plastic

Weight
approx. 2.5 kg

Important Notes

The continuous blowdown valve must be installed in the continuous blowdown line of the boiler (see example of installation).

Continuous Blowdown Ball Valve 510 PN 16 DN 15

Order & Enquiry Specification

GESTRA Continuous blowdown ball valve
Continuous blowdown ball valve 510
Acceptance inspection.....
Length of installation 76 mm

The following test certificates can be issued on request, at extra cost: In accordance with EN 10204-2.1, -2.2 and -3.1B.
All inspection requirements have to be stated with the order.
After supply of the equipment certification cannot be established. For tests and inspection charges please consult us.

Ancillaries

Conductivity controller LRR 1-50, LRR 1-52
Conductivity switch LRS 1-50
Conductivity electrodes LRG 16-9, LRG 16-4

Dimensions

Examples of installation

Example 1:
Conductivity electrode LRG 16-4
Conductivity switch LRS 1-50
Continuous blowdown ball valve 510

Example 2:
Conductivity electrode LRG 16-9
Continuous blowdown controller LRR 1-50
Continuous blowdown ball valve 510

Example 3:
Conductivity electrode LRG 16-4
Continuous blowdown controller LRR 1-52
Continuous blowdown ball valve 510

Supply in accordance with our general terms of business.
